Shadow hunters

Their Life Was Black And White
No Colour In Sight
Pretended Not To Love
& Were Fond Of Fights
They Lived In Castles
Made Of Grey Stones
But The Only Words That Were
Spoken:-
"Always Alone"
I Shivered To Think Of
Something So Sad
So Instead I tried To Convince
Myself I was Mad
But That Didn't Help
So I Started To Scream
& Tried To Persuade Myself
The Life Of The
"Shadowhunters" Was Just A
Dream.

WE NEED DIVERSE BOOKS

“We Need Diverse Books is a grassroots organization created to address the lack of diverse, non-majority narratives in children’s literature. We Need Diverse Books is committed to the ideal that embracing diversity will lead to acceptance, empathy, and ultimately, equality.”

- We Need Diverse Books official site

As a school with many cultures, I feel that our literature does not really reflect our colorful image. While there is nothing wrong with indulging in a non-diverse book, it is also important to see ourselves in the literature that we read. So, to support the movement, I have decided to make a section dedicated to books with diverse characters.

DIVERSE BOOK OF THE EDITION –

ARISTOTLE AND DANTE DISCOVER THE SECRETS OF THE UNIVERSE by Benjamin Alire Sáenz

This book centers around the friendship between two Mexican-American boys, Aristotle, an angry teen with a brother in prison, and Dante, a know-it-all lone swimmer. When they initially meet, they seem to be nothing like each other but the camaraderie evolves into a budding friendship, the kind that changes lives and lasts an entire lifetime.

It’s a beautifully-told coming-of-age story, lyrical and haunting in its writing. Despite the fact that there are no sudden plot twists or exciting thriller plots, it is a book that keeps you turning the pages until the end.

Aristotle and Dante’s characterization is done spectacularly. They are continually layered and exposed, becoming more complex but also becoming bare in some ways. Their emotions, quirks and habits are so heart-wrenchingly real that they resonate with every reader.

And as the story progresses, you come to realize that what seems like a simple story about a friendship, is actually a simple story about friendship but with themes woven in so deeply that gives the book an amazingly profound nature.

Although the author uses no complicated language or flowery words, it is able to convey the most impactful message through the author’s poetic prose. Sometimes, it is the shortest and most simple sentences that flood you with the most emotions.

This book will give you grief and joy and it definitely deserves all the praise it gets.

TASNEEM MAHER
We’re back with your favourite section – Interviews With Teachers! This time, we interviewed newcomer Mr Werner, who teaches Biology.

Q - What’s your favourite movie?
A- Braveheart and The Green Mile

Q - What are your hobbies?
A- I play lots of cricket, tennis, and do computer programming. I spend lots of time after hours doing mainly computer stuff. I play instruments as well but that died a bit.

Q - What instruments do you play?
A- Only the guitar. I bought a piano, but that was pretty useless because I got a piano with lights that teach you – you know, when the key lights up and you press on it. That was hopeless. It didn’t work.

Q - What’s your favourite food?
A- Pasta - Spaghetti Bolognese.

Q - Do you have any pet peeves?
A- I don’t think I have pet peeves at all. I don’t think there are many things that annoy me. However, if a person chews food and I can see what they’re eating. Now that’s just annoying.

Q - Would you consider yourself to be an introvert or an extrovert?
A- I’m such an introvert. [Interviewer: Really? It doesn’t seem like it.]
Q - What languages can you speak?

A- Mainly Afrikaans and English. I can greet in Russian. I can now greet and speak two full sentences in Arabic. In my third year I started learning/speaking Italian because I wanted to study at the University of Bergamo in Italy, but that didn’t work out that well.

Q - Tell us more about your educational background.

A- So I must give you my whole CV? I first went to school in the Free State, I literally was born and raised in Bloemfontein in the Free State. And then I went to school to Sentraal High. I then did my normal BSc degree at the University of Free State. Then I finished that and I started my Honours degree in the University of Free State. Then when I was done with that I started my Masters also at University of Free State, you know, where I did all my research stuff. Then I started my PhD at the University of Cape Town, but due to project funding I couldn’t complete that unfortunately.

Q - Five adjectives to describe yourself.

A- Easy-going, not difficult, very serious, caring, absolutely amazing... I’m just kidding.

Q - What is your favourite memory from your childhood?

A- Well it’s a sad memory because my uncle died, but then I got his little microscope.

Q - What does your name mean?

A- It means leader but I’m the middle child and in life that’s difficult... (edit: lol.)

Q - Where do you see yourself five years from now?

A- In Miami, on a beach, selling coconuts. No I’m just kidding. I always wanted to complete my research. We’ll see where the path leads me.
Q - **When did you choose to become a teacher and why?**

A- The last couple of years I was a Biotechniques sales representative and only teaching part time. But then I just thought, you know, I haven’t studied 8-9 years for selling stuff. That’s when I decided to go back into the field of education and teaching and doing it full time!

Q - **What would be your dream vacation?**

A- Probably in Miami on a beach. *Interviewer: What’s so special about Miami?* Because I’ve never been to Miami. What I like about Miami? You know the CSI series? Usually the first couple of scenes with all those cruise liners, I want to be there. When I saw that I was like ‘that’s where I’m supposed to be’.

Q - **What’s one skill you can never perfect no matter how much you tried?**

A- Probably playing the piano. I’ve failed at it so many times. Even the lights on the piano didn’t help because you have to memorise that stuff.

Q - **What is one of your weaknesses and how do you manage to overcome it?**

A- Believe it or not, I hated speaking in front of people. *Interviewer: You’ve obviously gotten over it.* Immensely. When you do science, the only way that scientists communicate with each other is by presenting your results. So when I started studying, I had to present my research and it became a weekly thing. And from a weekly thing it became a daily thing. I think that I’ve pretty much gotten over that but I didn’t like it. I’m still an introvert and I’m quite shy.

Q - **When where you most satisfied in a job?**

A- I usually set myself a couple of goals that I have to accomplish that I feel are needed to be good in the job that you do. I’ve always accomplished these goals. They might be personal goals, small things
you know. But if I can accomplish that then I know that I’ll be able to accomplish anything in that profession.

**Q - Describe a time when your work was criticised.**

A- In my research, it was the human umbilical/aortic vein endothelial cell line I was working with. I grew the cell line and I had to grow it on a cell culture surface because you had to resemble what happens in the human body in that specific areas. It did work perfectly but I had to ask for advice from experts. The expert was my supervisor and she gave me lots of advice that I didn’t take that well because I knew for a fact that I perfected that way of growing this specific cell line and it was the first time someone got it right in South Africa. She criticized my work because there was a different way that you can do it. That’s also one of my biggest accomplishments.

**Q - Describe your ideal working environment.**

A- I hate conflict. I hate fighting. So my ideal working environment would be, not a quiet one as I like interaction as well, but a nice, friendly, easy-going environment will do.

**Q - Was there a person in your career who really made a difference?**

A- My mother. My dad was a workaholic so I didn’t see him much. But my mother she looked after three boys and she motivated me. She was always there.

**Q - What are your lifelong dreams?**

A- I am so close to figuring out certain aspects of the clotting pathway in HIV patients. That’s the lifelong dream for me. That and for the treatment of specific breast cancer cells. For breast cancer in women, the treatments are specific. I’m so close to that as well. I managed to kill breast cancer cells in my honours and inhibit the growth, so now the next step is implementing that in our system.
Q - Why did you choose biology as your major?

A- When I saw my first cat hair under the microscope, that’s when I realised something’s going on that’s so small but there is literally a whole different world under the microscope. Then I always wanted to do biology.

Q - What was your proudest achievement outside work?

A- Outside work? I was a lab rat, so I didn’t have an outside world. Proudest achievement? Playing ‘Nothing Else Matters’ by Metallica on the guitar.

Q - Who are your heroes or role models?

A- My parents. My dad is like the leader of the family. He is like the deep thinker so all the difficult decisions I had to make in my life always went to him. My mother was there for all the support. She carried me through everything.

Q - What’s your favourite quote?

A- “Life is like a camera. Just focus on what’s important, capture the good times, develop from the negatives, and if things don’t turn out – take another shot.”
Girls Generation

Girls Generation also known as S-N-S-D, is a South Korean girl group formed by a company called SM Entertainment or SMTOWN. The group consists of 8 members: Taeyeon, Sunny, YoonA, Tiffany, Yuri, Sooyoung, Hyoyeon, and Seohyun. Actually the group used to have 9 members including a girl called Jessica who used to be the leader, but unfortunately she left the group in 2014. The group debuted on August 5, 2007 with their debut song “Into the World” and with their self-titled debut album. In 2009 they came up with their song “Gee”, which claimed top spot on KBC Music Bank and was named the most popular song of the 2000s. In 2010 the group signed with NayutaWave Records (present day EMI Records Japan).

In April 2011 Girls Generation's Japanese debut album was released, which topped the Japanese Oricon Albums Chart and then they became the first girl group in South Korea to achieve a double platinum certification. Today Girls Generation is one of the most famous girl groups in South Korea. They are also famous in other countries too. Some of their hit songs are, Mr. Taxi, I Got a Boy, Gee, Run Devil Run, and Oh.

SHREYA GHOSHAL
SINGER

SHREYA GHOSHAL IS A PLAYBACK SINGER. A PLAYBACK SINGER IS A SINGER WHOSE SINGING IS PRE-RECORDED FOR USE IN MOVIES. SHE HAS RECORDED SONGS FOR FILM MUSIC IN MANY LANGUAGES. SHE WAS BORN TO A BENGALI FAMILY ON 12\textsuperscript{TH} MARCH 1984. SHE HAS BEEN INFLUENCED BY SO MANY FAMOUS INDIAN SINGERS SUCH AS LATA MANGESHKAR, ASHA BOLSE AND MOHAMMED RAFI. SHE HAS RECEIVED FOUR NATIONAL FILM AWARDS, FIVE FILM FARE AWARDS, FIVE SCREEN AWARDS AND EIGHT FILM FARE SOUTH AWARDS. SHE GOT MARRIED TO HER CHILDHOOD FRIEND ON 5\textsuperscript{TH} FEBRUARY 2015. I PERSONALLY LIKE HER BECAUSE OF THE SWEETNESS OF HER VOICE. HER SONGS ARE CLASSICAL SO THAT IT MAKES THE MUSIC SO UNIQUE. WHEN I FIRST LISTENED TO HER MUSIC, I THOUGHT THAT HER VOICE WAS SO SPECIAL AND MELODIous AND IT HAS A SOOTHING EFFECT. SO I DECIDED TO MAKE HER MY FAVORITE SINGER. SHE ALSO SINGS IN MANY LANGUAGES. IF YOU WANT MORE INFORMATION ABOUT HER JUST [CLICK HERE](#)
China Bans Consoles

Why do you think consoles such as PS4, XBOX One and Wii are banned in China? We’d like to tell you the reason, as ironically, the Wii, the PS3 and the X box 360 are Chinese-made. The Chinese government is very concerned about their peoples’ health and wealth so they decided to ban all consoles because children could spoil their brains and would learn violence. They also said, “We thought that this was the best way to protect our Chinese youth from wasting their minds on video games, after a parental outcry”. The following year, online gaming exploded, and the market size hit 100 million gamers, so the ban did not stop the problem. Therefore, the Chinese president decided to ban the use of any console or electronic game.

Records broken in space!

We all dream of spending a day in space, but for astronaut Scott Kelly it's work. He has surpassed the record of the longest time spent in space. He is the first American to have spent nearly a year on the International Space Station (ISS), having spent 350 days (and counting!). He is scheduled to return from the ISS on March 3rd, 2016. Not every astronaut goes to space more than twice, but he has been there three times! His mission this time was to collect medical records. Mark Kelly and Scott Kelly are the first pair of twins to both become astronauts. NASA will compare Mark and Scott Kelly to compare the effects of space on the human body. He takes many amazing pictures of the Earth from space and updates his twitter account with these very regularly. Go check them out, the Earth is beautiful when seen from the cuppola on the ISS!

Grade 8 girls
The Peregrine Falcon also known as the “Falcon Bird” is the fastest living animal in the world and not so surprisingly that the fastest animal is not the cheetah. Oddly, the cheetah is the eleventh fastest animal and the Falcon Bird is way faster. Surprisingly, the Falcon Bird is faster than the fastest car in the world, with unbelievable speed 389 km/h. This bird is the size of a crow and is 14-19 inches. Most species live in North America especially Canada. Some species of this bird have the ability to survive in the Arctic Tundra. Their heads are black and blue with yellow beak and feet. It has a small tail, very strong claws, is a carnivore and hunts on other birds. This bird is nearly endangered and rarely found in zoos. Mostly because America hunted these birds in the 20th century, because their claws are very valuable. Like other birds, the Falcon Bird migrates to South America mainly to the Amazon Jungle which is almost 25,000 kilometers away.
The Banana slug is known for its name because it looks like a ripe banana.

It is the slowest animal in the world. It grows to the maximum size of 30 centimeters and weighs up to 115 grams. It only has one lung and it is on the right side. It's got teeth on its tongue and it has 2 tentacles which are used to sense its environment. If a predator bites a slug’s tentacle, it can grow another one instead of the one bitten. It is usually found in North America. When it lays eggs, it doesn’t really care where it lays it and it doesn’t care about its eggs. Its speed is 0.000023 m/s (7.5 x 10-5 ft/s) and it is the slowest moving animal ever. Also, there is an animal called coral that doesn’t move and settles at the bottom of the sea.
GOOD AFTERNOON FRIENDS TODAY I’M TALKING ABOUT THE SUN AND THE NINE PLANETS.

THE SOLAR SYSTEM IS A PART OF OUR UNIVERSE AND THIS INCLUDES THE SUN AND THE NINE PLANETS. THE PLANETS REVOLVE AROUND THE SUN. THE SOLAR SYSTEM ALSO COMPRISSES CELESTIAL BODIES LIKE COMETS, METEORS, ASTEROIDS, MOONS AND STARS. THE SUN IS THE LARGEST OBJECT IN THE SOLAR SYSTEM. IT IS A MEDIUM-SIZED STAR AND IT IS MADE UP OF GASES. THE SUN IS SO BIG THAT YOU CAN FIT MILLIONS OF EARTHS INTO IT.

THE EARTH IS THE ONLY PLANET IN THE SOLAR SYSTEM WHICH CONTAINS THE THINGS ESSENTIAL TO LIFE. THE SOLAR SYSTEM IS MADE UP OF AN INNER AND AN OUTER CORE. THE SUN IS THE LARGEST OBJECT IN THE SOLAR SYSTEM. MERCURY, VENUS, EARTH AND MARS ARE KNOWN AS THE ROCKY PLANETS. SATURN, URANUS, JUPITER AND NEPTUNE ARE KNOWN AS THE GAS GIANTS BECAUSE THEY ARE MADE OF GASES.

THE SOLAR SYSTEM WAS FORMED INSIDE A CLOUD OF GAS CALLED THE SOLAR NEBULA. THIS BECAME HOTTER AND SMALLER, UNTIL IT FORMED A SUN. DEBRIS WHICH WAS AROUND THE SUN JOINED TO FORM THE PLANETS. VENUS IS THE HOTTTEST PLANET IN THE SOLAR SYSTEM. LAST BUT NOT LEAST, MERCURY IS FAIRLY CLOSE TO THE SUN. THANK YOU.

Psychology

**Borderline Personality Disorder (BPD)**

**What is BPD?**

Borderline Personality Disorder is a serious mental illness marked by unstable moods, behavior, and relationships. It was listed as a diagnosable illness for the first time in 1980.

**Signs and symptoms**

- Extreme reactions – including panic, depression, rage, or frantic actions – to abandonment whether real or perceived
- A pattern of intense and stormy relationships with family and loved ones, often veering from extreme closeness and love (idealization) to extreme dislike or anger (devaluation)
- Distorted and unstable self-image or sense of self
- Impulsive and often dangerous behavior, such as reckless driving, binge eating and spending sprees
- Recurring suicidal behavior or threats or self-harming behavior, such as cutting
- Intense and highly changeable moods
- Feelings of emptiness and/or boredom
- Inappropriate, intense anger or problems controlling anger
- Having stress-related paranoid thoughts.

People with this disorder also have high rates of co-occurring disorders, such as depression, anxiety disorder, substance abuse and eating disorders, along with self-harm, suicidal behavior and completed suicides.

Seemingly ordinary events may trigger symptoms. For example, people with BPD may feel angry and distressed over minor separations – such as vacations or business trips or sudden changes of plans – from people to whom they feel close. Studies show that people with this disorder may see anger in an emotionally-neutral face and have a stronger reaction to words with negative meanings than people who do not have the disorder.
Causes

Most experts agree that there’s no single cause for Borderline Personality Disorder. It is likely to be caused by a combination of factors, including:

- Genetics
- Neurotransmitters (chemicals used by the brain to transmit signals)
- Neurobiology (structure and function of the brain and the nervous system)
- Environmental factors (events that happened in the past)

What are the risk factors for BPD?

Adults who come from families where divorce, neglect, physical abuse, substance abuse, or death occurred are at higher risk of developing BPD. In children, the risk for developing this disorder appears to increase when they have a learning problem or certain temperaments. Adolescents who develop alcohol abuse or addiction are also apparently at higher risk of developing BPD compared to others who do not.

Shahd's Lazy cake recipe:

If you are one of those not very confident bakers, this recipe is perfect for you.

Ingredients:

- 5 tablespoons of cocoa powder
- 1 cup of milk
- 1 egg
- 2 tea biscuit packets
- 125 grams of butter

Method:

- In a tray or plate break down each biscuit into 6 pieces and make sure that the pieces are medium sized
- In a hot pan add 125g of butter and wait for the butter to melt
- Add 1 cup of milk and start whisking
- Add the egg and continue whisking
- Add 5 tablespoons of cocoa powder one at a time and continue whisking
- Finally add the biscuits and stir the mixture
- Leave to cool for 30 minutes
- On a piece of foil spread the mixture horizontally to make a long roll
- Roll the foil with the lazy cake to obtain a long roll
- Allow it to rest for at least 1 hour in the refrigerator
- Cut the roll and serve

By: Shahd Naasan
Mrs Yvonne’s Favourite Recipe

Sunshine Toast

You will need:

1 slice of bread

I small or medium egg

A large cookie cutter (heart-shaped is my favourite)

A baking sheet

Heat your oven to 200°C, 400°F, gas mark 6, before you start.

1. Dip a paper towel into some butter. Then, rub the butter all over the baking sheet to grease it.

2. Using a knife, spread butter on one side of the slice of bread. Then press the cutter into the middle of the bread

3. Lift out the shape you have cut out. Put both pieces of bread onto the baking sheet, with their buttered sides upwards.

4. Break the egg into a saucer. Then, carefully slide the egg into the hole in the bread. Put the baking sheet in the oven.

5. Bake the bread and egg in the oven for seven minutes. Bake it for a little longer if you don’t like a runny egg yolk.

6. Wearing oven gloves, carefully lift the baking sheet out of the oven. Use a fish slice to lift the pieces of toast onto a plate.

The toast needs to be eaten as soon as it is cooked. Enjoy!
Sports

On the afternoon of Thursday 29/10/15 there was a very interesting match between Dortmund and Manchester City. It was a close score though of 2-1 for Dortmund. Everyone played fantastically and tried really hard. Manchester City tried really hard and cooperated but not enough to beat the lion tamers. Until the first half it was a tie 0-0 but the lion tamers didn’t like it. Mustafa Sadeq, Dortmund’s team captain, passed to Mohanad Hani Mustafa. He didn’t have a chance to shoot the ball so he passed it to Ahmed Sadeq who scored a goal at an angle impossible to be blocked. The score was 1-0. In the second half Mustafa Sadeq crossed a really strong high pass to Mohanad but didn’t reach him. Unfortunately it hit the leg of Manchester United striker Zaid Emad and bounced above the goalkeeper’s hand.
In the School Champions League, the first match was a clash between Manchester United and Real Madrid. This match was probably the hardest match to guess the winner as one team attacked then the other, with two focussed goalies and strong defence. Real Madrid managed to sneak up a goal early in the game scored by Hamza, the team leader of Real Madrid and after very hard work by Mostafa. Even though Real Madrid scored, Manchester United didn’t lose hope and managed to score to make thing even near the end of the first half. The goal was put in neatly by Ali Makhaitah after an assist by Mohammed Sameh. Once the second half started, Ali again managed to shoot from out of the box and the ball zoomed into the net which put United ahead. Real Madrid were running out of time with several attacks and several saves by Mazin the United goalkeeper, until Hamza again used his skills and speed, shot the ball hard, and managed to score with the ball edging off the goalkeeper’s gloves and made it tied 2-2. The match ended with the same score. The two teams are looking for a win in their next match.

Sportsmanship

I have always been taught good sportsmanship and the importance it plays in my life. That’s why I think sportsmanship plays a vital role in daily lives as well as sports.

Good sportsmanship really is playing by the rules, respecting your opponents and putting hard work over winning. It teaches students how to be considerate, show respect and play fairly.

To me, sportsmanship means making friends. It can help you make friends because if you are nice, people will like you. And if you beat them, do not tease them because there is a good chance you will become friends.

Sportsmanship also means competition because without teasing each other we can have fun playing against other kids and they can have fun with us. Competition can make us a better person and help us learn more about people and the game we are playing.

Sportsmanship is very important when we play sports and when we are involved in other activities. We shouldn't get angry when things don’t go right. Sportsmanship teaches people how to get along better with everyone, including our opponents. When we show sportsmanship we have a good attitude and better teamwork.

Sportsmanship includes teamwork. It means the team working together as one. When we play fair we feel good. So it’s important to have sportsmanship.

Good sportsmanship comes from players who are firm. Therefore, they will do their best all the time. We gain sportsmanship by controlling our actions. Sportsmanship can take us to a high level in life. Sportsmanship can do a lot for our future.

So next time if you hear “it’s good to show sportsmanship” you will understand why. Also remember “Dare to play fair!” It will help you go far in life and in everything you do. Also, having good sportsmanship will help you succeed in life.

By: Uzair Butt

Grade: 6 boys
1. What has 4 letters, yet has 3 letters, sometimes has 9 letters, occasionally 13 letters, never has 5 letters and has 3 letters.
   
   Answer: It is not a question, it is a statement.

2. How many seconds are there in a year?
   
   Answer: 12 (January 2\textsuperscript{nd} February 2\textsuperscript{nd} March 2\textsuperscript{nd})

3. What is the next letter in the sequence JFMAMJJASON_?
   
   Answer: D. The rest is the first letter of each month.

4. What do call a cow that eats your grass?
   
   Answer: A lawn moo-err

5. What is the slipperiest country?
   
   Answer: Greece

Joke:

Jimmy comes home early. His Mom asks him “Why are you home early?”
Then Jimmy said “Because I answered a question that nobody knew.”
Mom said to herself “Wow my son is a genius” then she asked Jimmy “What
question was it?” So Jimmy answered, “WHO PUT THE GARBAGE BIN
ON THE PRINCIPAL’S CAR?”
Facts

- There is no gravity at the center of the earth
- Some people can hear their eyeballs moving
- There is real gold in the sun
- A dolphin sleeps with one eye open
- A crocodile cannot stick its tongue out
- Bats always exit a cave to the left
- Tigers have striped skin, not just striped fur
- At birth a giant panda is smaller than a mouse
- An African elephant has only 4 teeth

By Luggy

Grade 7 girls
1. Knock, knock. 
   Who’s there? 
   Iva. 
   Iva who? 
   I’ve a sore hand from knocking!

2. Q: What goes up when rain comes down? 
   A: An umbrella!

3. Q: If I have it, I don’t share it. If I share it, I don’t have it. 
   What is it? 
   A: A Secret.

4. Q: What can you catch but not throw? 
   A: A cold.

5. Q: What is at the end of a rainbow? 
   A: The letter W!

6. Q: Who says sticks and stones may break my bones, but words will never hurt me? 
   A: A guy who has never been hit with a dictionary.

7. Q: Why did the orange stop in the middle of the hill? 
   A: It ran out of juice!
